ABOUT ME

Detail-oriented Software Engineer with a strong background in designing and implementing scalable web applications.
- Substantial involvement in the end-to-end development of front-end projects.
- Competent with JavaScript, TypeScript, React.js, Vue.js and Modern CSS.
- Deep understanding of Authentication systems, Web performance optimization, and Micro frontends.
- Oversaw diverse projects in the E-commerce, Advertising, and Infotainment industries.

WORK EXPERIENCE (5+ YEARS)

● **The Farm GmbH | Berlin (Feb 2022 - Present)**
Frontend Developer
- Developed a 10-page responsive site along with a secured login system using OAuth2.0, React.js, Typescript, and Tailwind CSS.
- Coded and styled 6 radio streams used by radio listeners across Germany using Nuxt.js.
- Orchestrated as one of the lead front-end developers focusing on migration from Vue2 to Vue3 and unit testing(JEST) alongside mentoring Interns.

● **Relaxdays GmbH | Halle (Aug 2019 - Jan 2022)**
Frontend Developer
- Developed a product backlog micro frontend that provides article information across 7 European countries using Javascript and React.js.
- Coded an internal permission app for managing the permissions of all 150 employees using JWT authentication and OAuth2.0 authorization.
- Integrated Datadog APM to monitor and optimize application performance, resulting in a 20% improvement in load times.

● **Legal Horizon AG | Magdeburg (Aug 2018 - April 2019)**
Master Thesis Internship
- Developed a hierarchical faceted search UI for nested legal documents.
- Accomplished extensive research on 10 different state-of-the-art search user interfaces and examined the speed, scalability, and user interaction.
- Designed and coded a search Interface that provides all the European laws using AngularJS and CSS.

● **SignSpin UG | Magdeburg (Jan 2018 - July 2018)**
Mobile Application Developer Internship
- Designed and developed a cross-platform mobile application to track employee work schedules using Angular, Firebase and Android SDK.
- For better evaluation of the application, a 3-day feature trial run was carried out across three different cities with 50 people using the application simultaneously.
- Different technologies like Ionic, Cordova, and Git were leveraged during development.
